

## ALARM CLOCK PRO PLUS

# The alarm clock that tells you when the TV show starts.

Nowadays, mobile phones and tablets have become a natural part of our everyday lives, and we use a variety of text messages, video chats and phone calls to stay in touch. While staying in the loop can be challenging enough, it's even worse if you have trouble hearing the ring signals, for instance during the nap.

Now you can connect your landline and mobile phone directly to the alarm clock to amplify the ring signal. Using a loud alarm, flashing lights and a vibrating pad, it is guaranteed to awake you when someone needs to get a hold of you. If you want, it can even show when you receive a message or remind you when your favorite show begins. So now you can relax peacefully, knowing that you won't miss anything important.

### Peaceful sleep

Connect the alarm clock to your mobile phone or tablet, and it will alert you when you receive a call or message.

### Effective wake up

Using an amplified alarm, flashing lights and a vibrating pad, it is guaranteed to awake even the heaviest sleeper.

### Easy to use

The large, clear display and ergonomic dials makes it very easy to set the time and alarm.

### Built-in night light

The gentle blue light will help you find your way back to bed if you need to get up at night.
