

# The strong, silent type

Does your alarm clock  
wake up everyone in  
the neighborhood  
except you?

Now you can safely turn off the  
sound on your alarm clock and  
not have to worry about over-  
sleeping.

The new alarm clock from Bellman  
& Symfon wakes you with a high-  
intensity flashlight, powerful  
vibrations and sound directly in  
the pillow – perfect when you  
need to get up on time without  
waking others.
