

Boost your hearing aids

Discover the Domino listening system

Domino is a listening system that helps people with hearing loss to hear better in busy situations, where hearing aids alone may not be enough. It brings out the words so you can hear them loud and clear, even when there is a lot going on in the background. This means you don't have to make so much of an effort to hear what people are saying.

Use Domino, for example, in a business meeting, when you're out dining with friends, or to hear a distant speaker at a seminar.
