Domino Classic is a personal hearing system that helps you hear better in most everyday situations, whether you use hearing aids or just suffer the occasional hearing difficulty.

Digital signal processing. Domino Classic uses digital state-of-the-art signal processing technology. As a result, the system delivers music and speech with incredible detail, even in difficult listening situations.

Worry free communication. Domino Classic uses the 2.4 GHz global frequency standard for wireless broadband communication, just like your Wi-Fi computer at work. This means you can use Domino Classic anywhere in the world.

The system uses secure 128-bit digital encryption technology which makes it virtually impossible to eavesdrop.

Pocket size and super light. The units are as small as a modern cell phone and weigh just 2½ oz each. So they can be kept discreetly in your pocket without weighing you down.

Easy to use. The system is virtually intuitive to use. All functions are accessed with the simple press of a button and there are no complicated menus to navigate.

Long lasting power. The units are powered with rechargeable lithium-ion batteries, just like a modern cell phone. So you never need to worry about buying new batteries.

Enjoy music and TV. Connect the Domino Classic transmitter to your TV or stereo system and enjoy wireless broadband Hi-fi sound at your own volume.

High quality. Domino Classic is designed by Bellman & Symfon of Sweden and comes with a two-year worldwide warranty.
