

Bellman Alarm clock

The strong, silent type

Waking up has never been easier

Does your alarm clock wake up everyone in the neighborhood except you? Now you can safely turn off the sound on your alarm clock and not have to worry about oversleeping.

The new range of alarm clocks from Bellman & Symfon wakes you with high-intensity flashing lights, powerful vibrations and sound directly in the pillow – perfect when you need to get up on time without waking others.

High intensity flash
Four built-in bright flashing LED lights.

Night light beacon
Guides you back to bed if you are up at night.

Bed shaker
Vibrates and emits a sound in the pillow.

Battery backup
Keeps the clock working during power loss.

Extra loud alarm
Ascending 100+ dB multi-frequency signal.

Smart snooze
Decreases the interval by 2 minutes at a time.

Wake up to flashing lights

When you want to get up in the morning, waking up to flashing lights is a great alternative or addition to a sounding alarm. We have integrated high intensity LED flashes; the same type you will find in a modern camera or a cell phone. With the difference that the alarm clock is equipped with four flashes instead of just one.

This means it's effective even during the day or if you prefer to sleep with the lights on.

Find your way in the dark

Have you noticed how difficult it can be to find your way back to bed if you need to get up at night? Then it is easy to turn on the bedroom lights which may disturb your spouse's sleep.

Because of this, we have equipped the alarm clock with a special night light. It acts like a beacon and the gentle blue light will guide you back to bed without disturbing a living soul. This means you no longer have to stumble in the dark if you crave a midnight snack.

Extra loud, audible alarm

The alarm clock from Bellman & Symfon delivers a signal of more than 100 dB. The alarm increases gradually in volume, so you have plenty of time to turn it off before others might be disturbed.

The alarm clock features a smart alarm signal that sweeps through the frequencies so that, even if you have trouble hearing for instance high frequencies, you will not miss it.

Wake up to vibrations

When you buy an alarm clock from Bellman & Symfon, a powerful bed shaker is included in the package. Just place it under your pillow and it will wake you up with strong vibrations when the alarm goes off. The bed shaker that comes with the Pro and Visit model also emits a sound.

Smart snooze

When you want to make the most of your beauty sleep, you will really appreciate the smart snooze. It differs from others in that it reduces the snooze interval from 9 to 2 minutes, by 2 minutes at a time.

This will give you plenty of time to wake up, but also enough time for a hearty breakfast without unnecessary stress. Give it a try; both you and your stomach will love it.

Reliable in all conditions

Have you ever overslept and discovered that the alarm clock stopped working due to a power failure? Now you no longer need to worry about that. The clock features a powerful battery backup that will step in whenever the power goes out. The backup battery does not only keep the time, it also keeps the bed shaker and flash lights at full power.

The Visit model - for a relaxed sleep

Sleep soundly at night

With a Visit alarm clock on the nightstand, you will know if there is a fire in the house. Install a Visit Smoke alarm, and the alarm clock will wake you up if an accident should occur.

Never miss a visitor

There is no need to guard by the door when you expect visitors. Place a Visit Push button transmitter by the front door and go back to sleep. The alarm clock will alert you when they arrive.

Be there for your baby

There is no need to stay awake if you are afraid to miss when the baby cries. Place a Visit Baby cry transmitter next to your child's bed and the alarm clock will alert you when the baby needs you.

Never miss a phone call

The alarm clock notifies you automatically when the phone rings, even if you sleep a couple of rooms away from the phone. Simply plug in a Visit Telephone transmitter and you will never miss any calls.

The Visit model is our most flexible alarm clock. It is connected to our alerting system, **Bellman Visit** and will give you a safe and relaxed sleep, without worrying that you might miss any important signals in your home.

Besides waking you up in the morning with sound, light and vibrations, it will also alert you if there is someone at the door or on the phone, if your child needs attention or if there is a fire in the house. A low-cost insurance that will help both you and your family sleep better.
