

The difference between hearing and **hearing**

Listening situations

Meet the audio family

A solution for every need

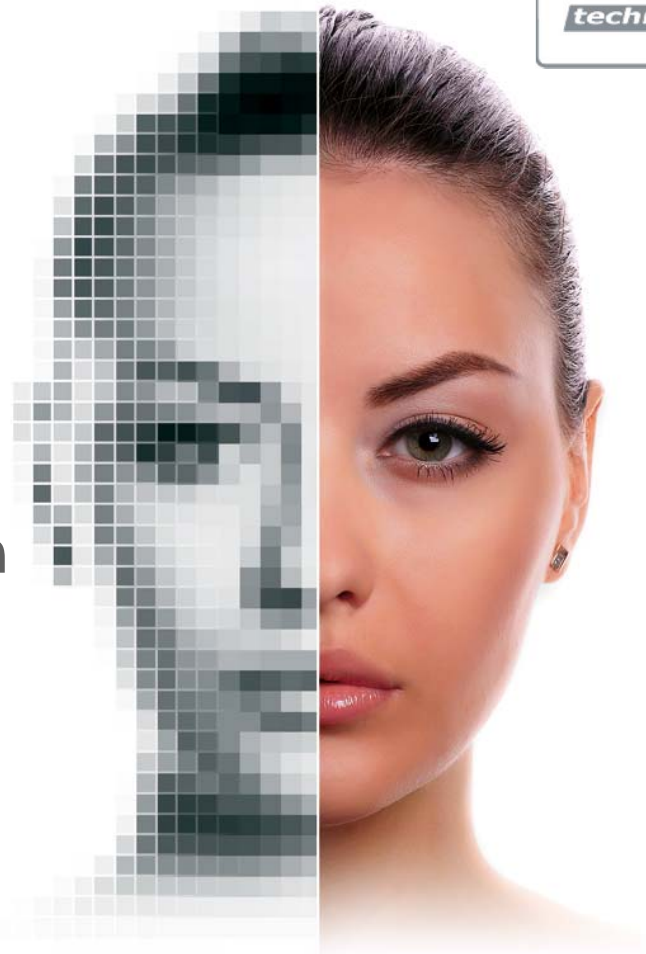

Facts & figures

Natural sound with incredible **detail**

- ➔ Digital signal processing
- ➔ 10 band noise cancellation
- ➔ 10 band dynamic compression
- ➔ Amazing detail
- ➔ Sound with natural colour

Worry **free** communication

- ➔ **Wireless Secure Encryption, WiSE**
- ➔ **128-bit digital encryption**
- ➔ **Impossible to eavesdrop**
- ➔ **Great for confidential business meetings**

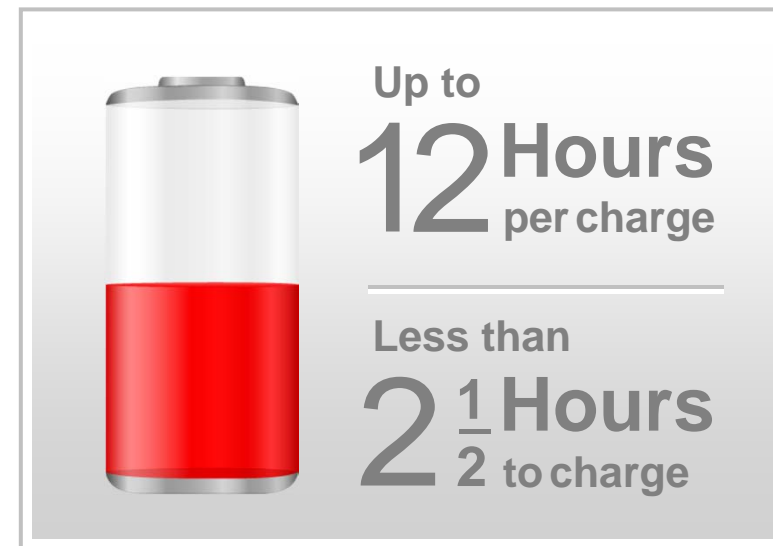

Intuitive user interface

- One button - one function
- No complicated menus to fumble through
- Soft grip material

Long lasting power

- ➔ Rechargeable Li-ion battery, like any modern cell phone
- ➔ Up to 12h operation
Less than 2.5h to charge
- ➔ USB universal charger

Light and **pocket** size

2½ oz – no heavy pockets

22 mm

99 mm

48 mm

Domino Classic, R2

Great for **TV** and music

- TV
- Computer
- Radio
- MP3
- DVD

Great while travelling

- ➔ **Travel Smart 2.4 GHz**
Works perfectly
anywhere in the world
- ➔ **USB powered universal
charger.** Mains for US,
UK, AU and EU
- ➔ **Durable travel case**

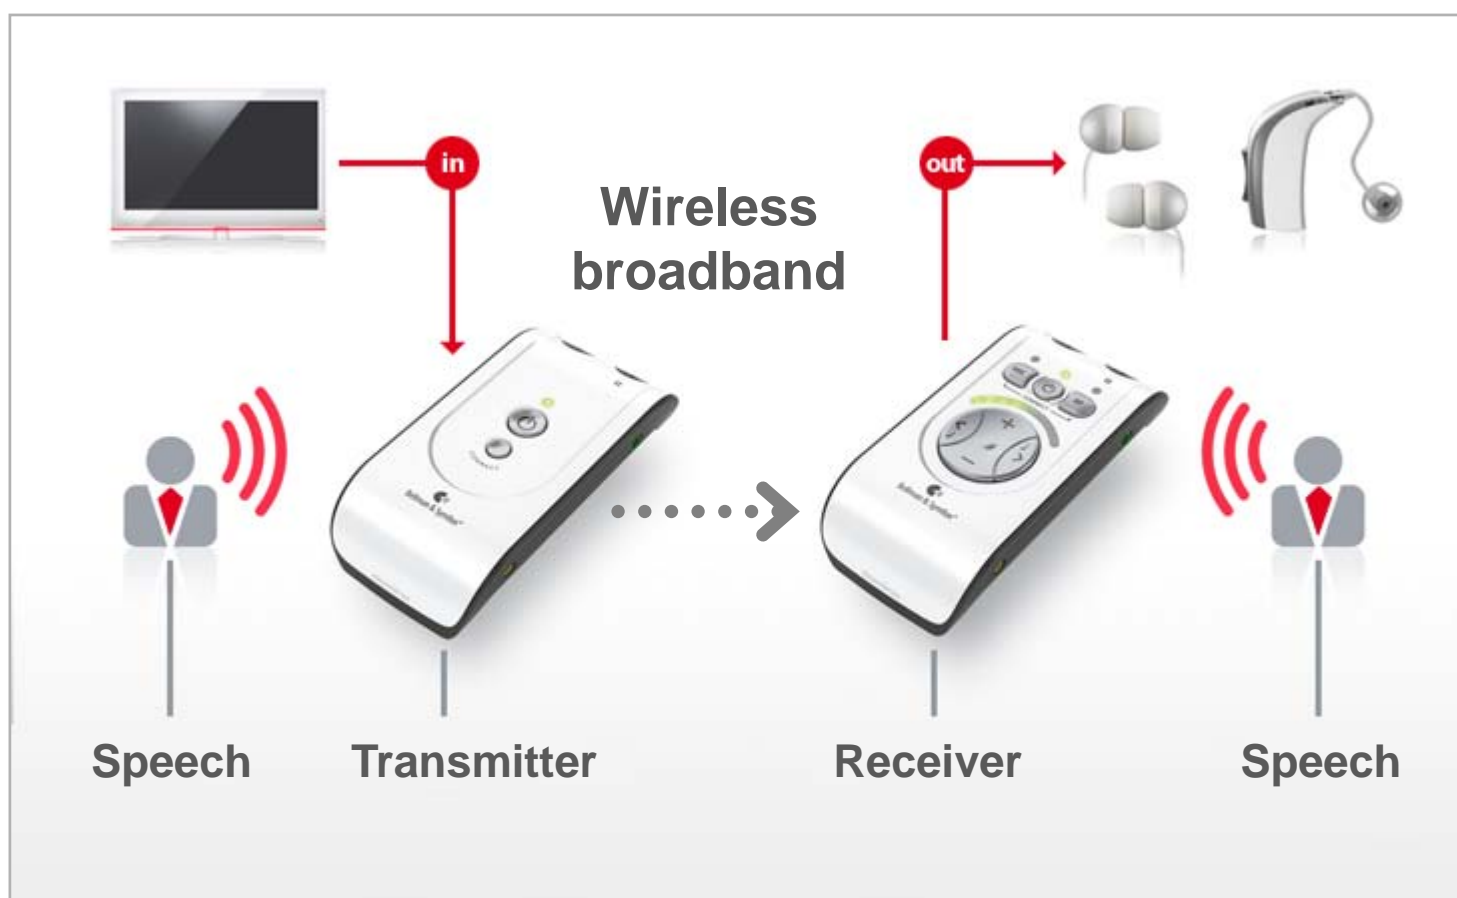

Boost your hearing aids

- ➔ Connect a neck loop and Domino further amplifies speech
- ➔ Practical remote for easy adjustment of volume, tone and microphones
- ➔ Amplifies the TV sound in your hearing aid

How it works

Ideal listening situations

**One-on-one
conversations**

**Listening to the
television**

**Small meetings
e.g. a café**

**At work
Meeting/seminar**

**In school
During class**

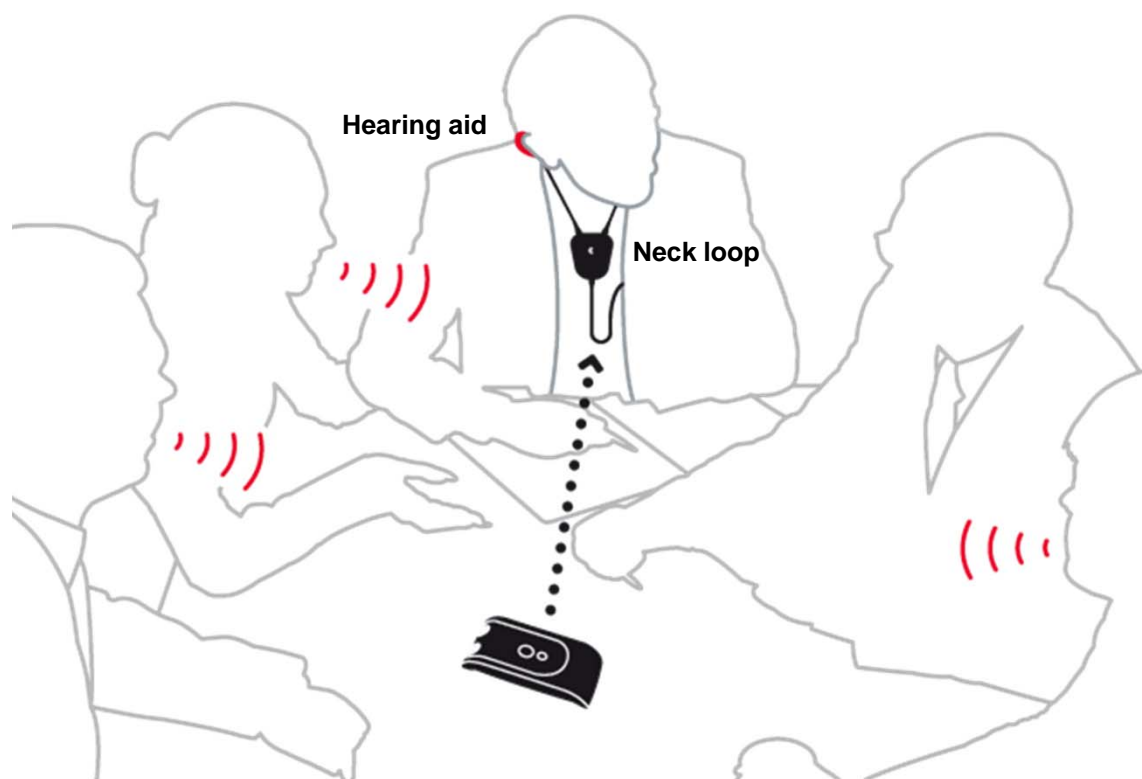

**Outdoors
Taking a walk**

**In stores
Talking to a clerk**

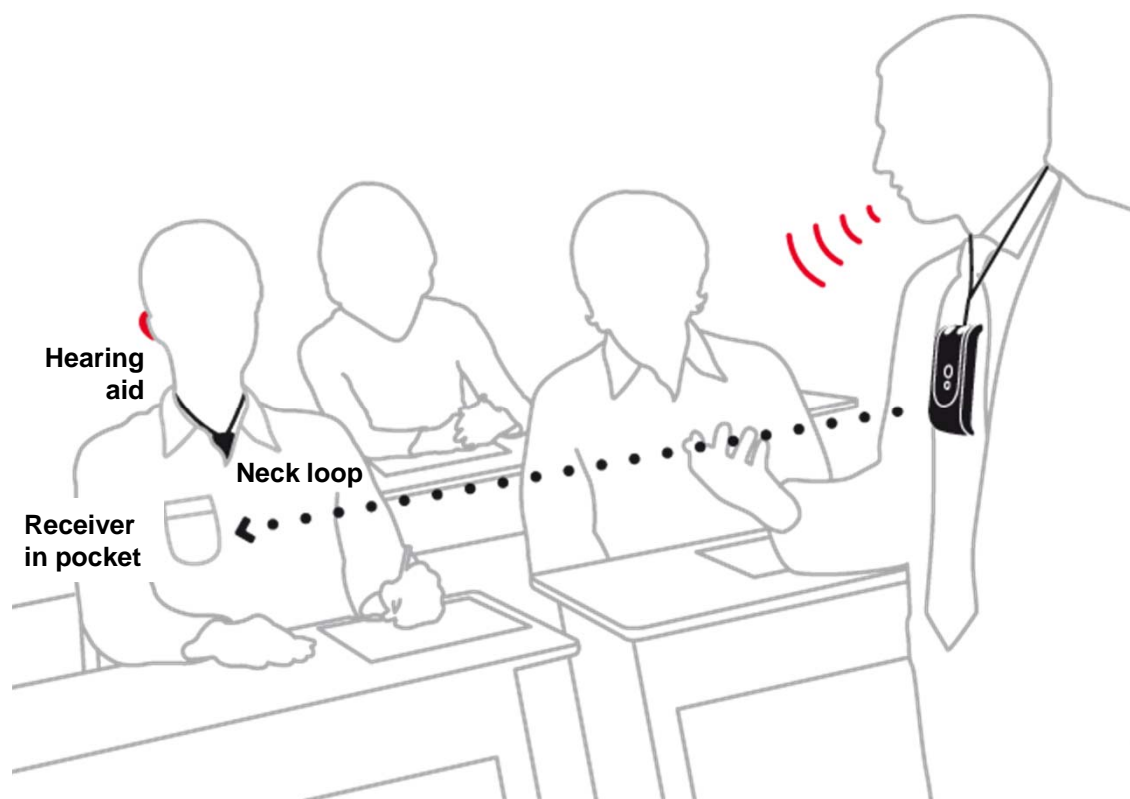

**Listening to music,
Stereo, MP3 player...**

At work

When more than one person speaks at the same time it can be real be hard to distinguish what is being said.

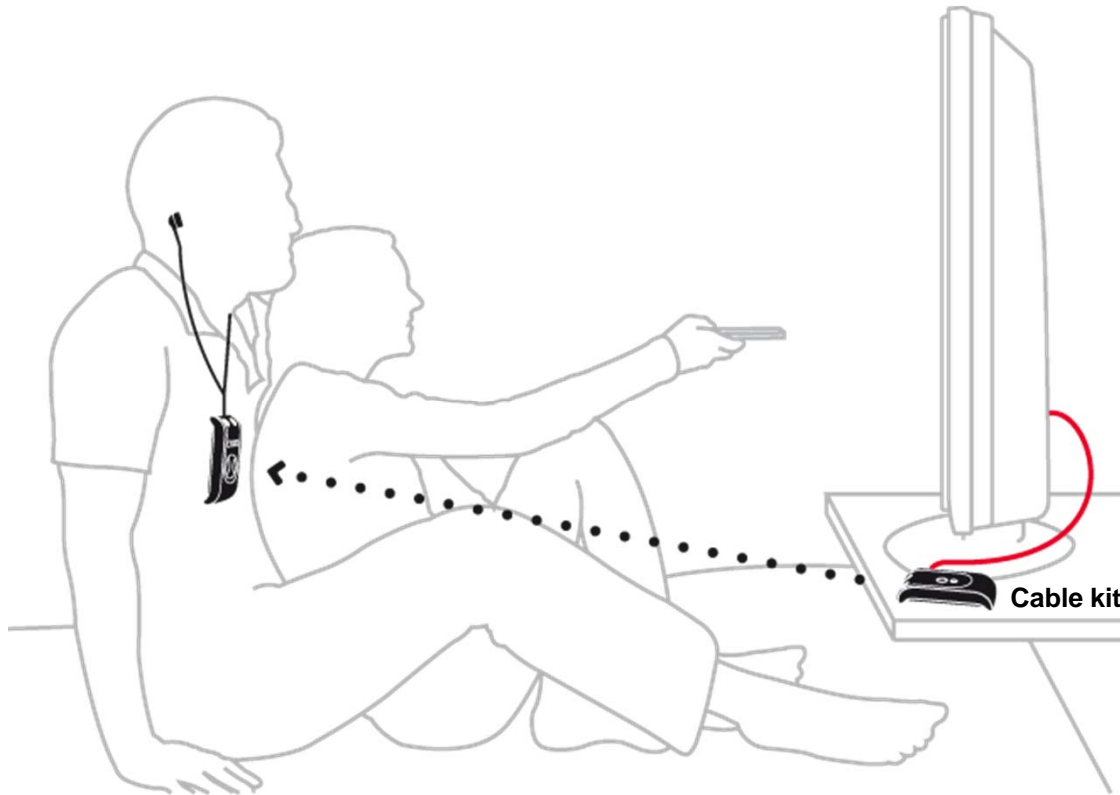

Domino helps you to hear better in these situations and you can easily place the transmitter close to a distant speaker.

In class

Even if you are sitting in the back, you can hear the teacher as he was sitting next to you. Clear and noise free.

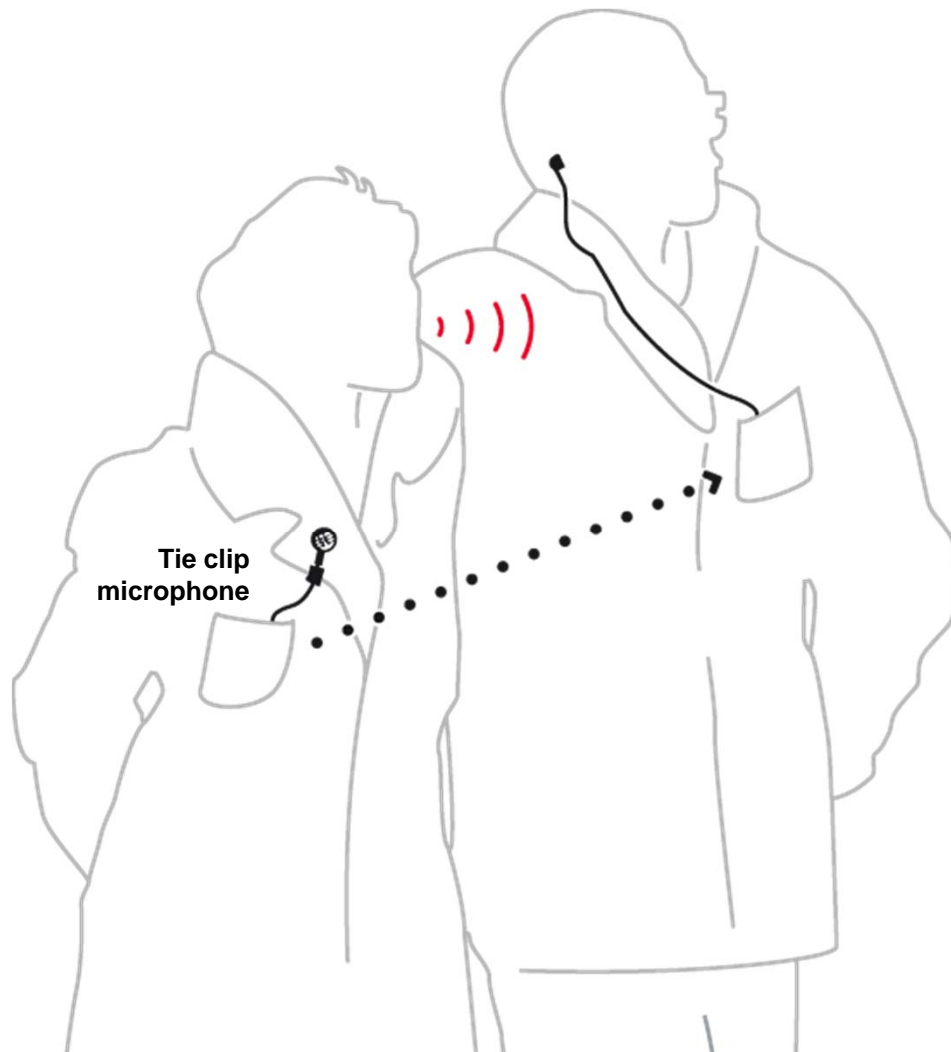

If you want to communicate with a schoolmate beside you, just push the “**Push To Listen**” button to pick up sound from your close environment.

At home

Connect your Domino Classic transmitter to the TV and sit back and enjoy perfect sound in full stereo. No need to crank up the volume to the max.

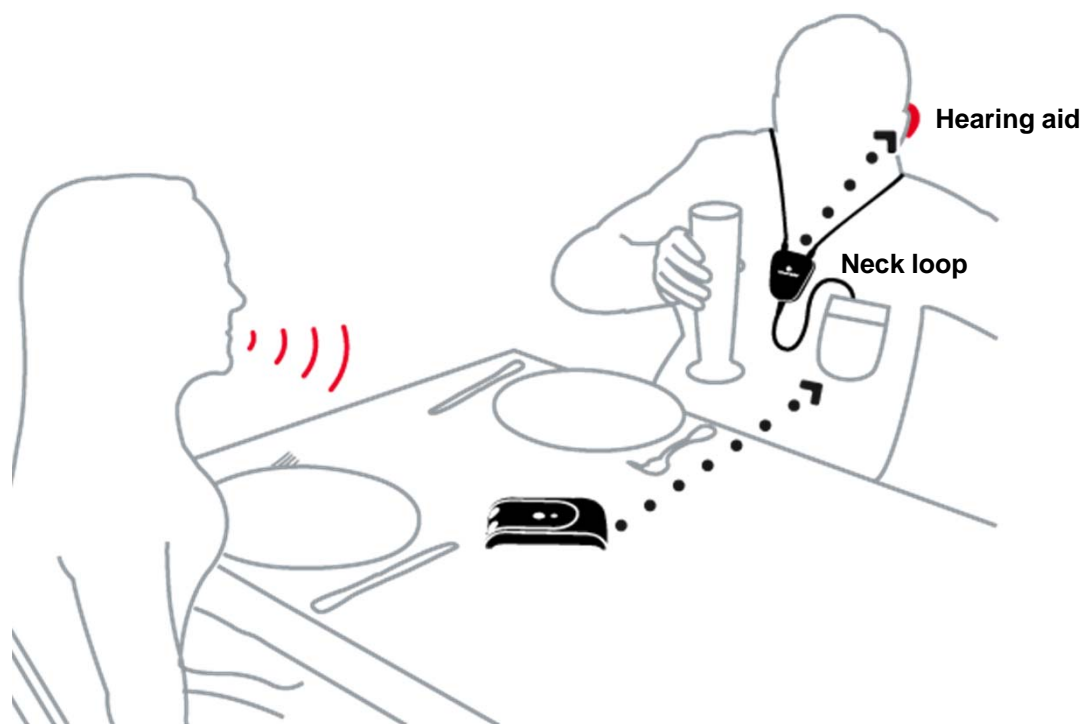

When you want to discuss the film, you can easily mix the sound from the TV with the internal microphones on the receiver. *“Push To Listen”*

Outdoors

When you are out for a walk, speech is often directed away from you. This in combination with traffic noise makes it very difficult to follow a conversation.

Domino suppresses the noise and overcomes the distance from the speaker very effectively.

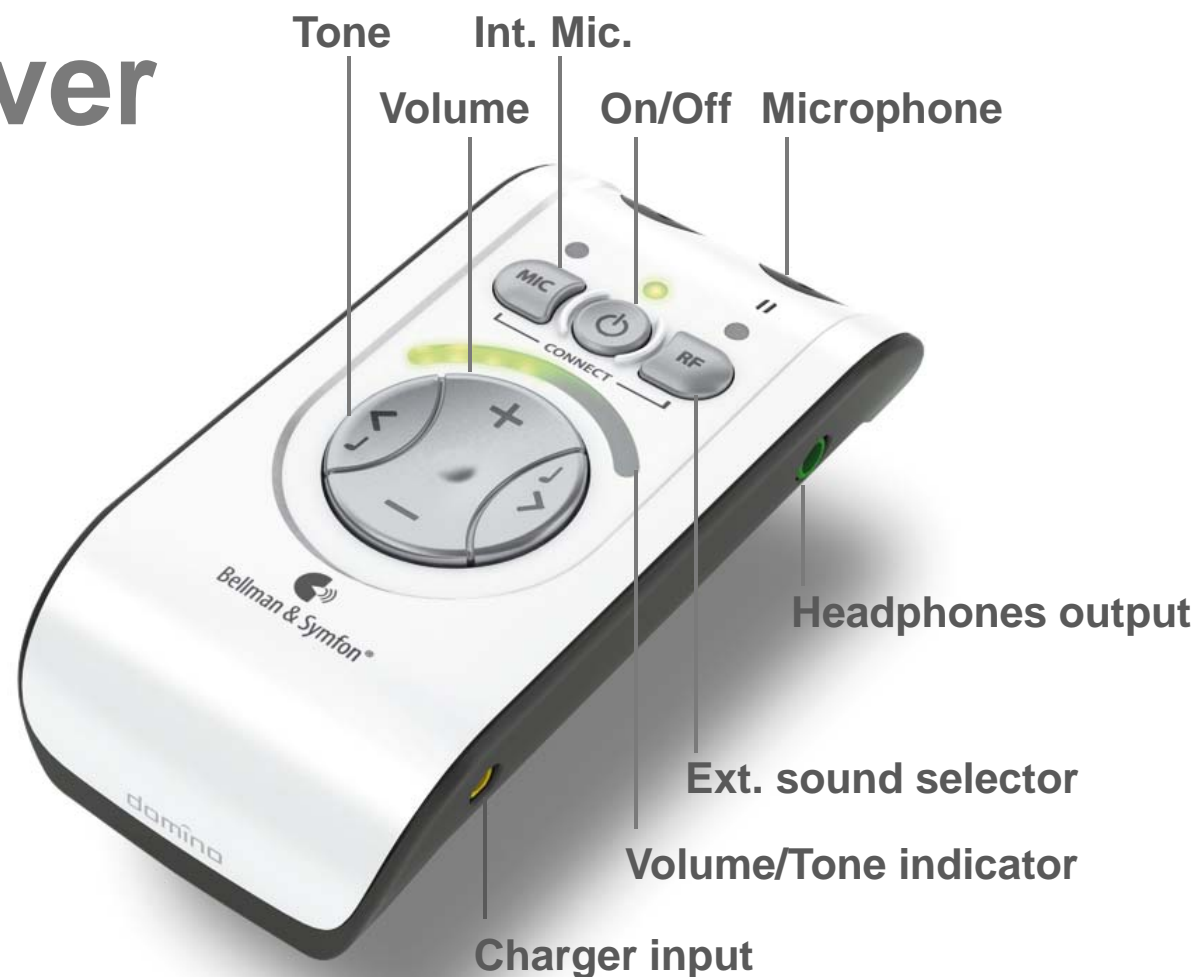

With hearing aid

Improves the performance of your hearing aids radically. Especially when listening to speech at a distance.

Great for watching TV or listening to music.

Acts as a remote for easy adjustment of tone and volume
