

## Does your mother **ignore** your calls?

Perhaps she just has trouble hearing the signal.

As your mother gets older it's not unusual that age takes its toll on the hearing. Maybe you've noticed that your mother seems harder to reach over the phone or that she doesn't always open the door when you come for a visit?

Now there's a simple solution. It's called Visit and it will alert her whenever the doorbell or phone rings. So now on she'll never miss a call or visitor again.
