Outlet for phone and bed shaker

Battery backup (BE1442)
Works during power loss

Completely silent alerting.

The Flash Receiver from Bellman & Symfon is part of the Visit system that helps you to keep tabs on your home. It alerts you with bright flashes when the doorbell or telephone rings, when your baby needs you or if a fire should occur.

Powerful and portable

The flash receiver is very easy to set up and use. Just connect it to the mains and place it on a table or shelf. You can also mount it on the wall using a wall bracket accessory.

The flash receiver produces bright flashes that are noticeable even in large areas and uses colored lights to differentiate the Visit signals. In addition, the rotating top makes it easy to direct the light.

The flash receiver features separate outlets for landline- and mobile telephones. Additionally, you can connect a bed shaker and wake up to vibrations if something should happen while you are asleep. The BE1442 model is also equipped with a battery backup.
